[EDTA CHELATION](#) made by Arizona Natural Products offers a Calcium Disodium EDTA. In their brochure, it states, “Good health begins with strong immune and cardiovascular systems working in a toxin-free environment. Our formulas help support those systems for a healthy, energetic life.

It is a chelating agent that binds to certain toxic metals in the body, and then expels them through the urinary tract. Its ability to grab and remove heavy metals has made it the standard treatment for exposure to lead and other heavy

metals. EDTA Chelation Therapy strives to reduce plaque buildup in the arteries by removing (or ‘chelating’) the metals and free radicals that restrict blood flow, which is a primary cause of heart disease.

Oral EDTA Recommendations:

-Take EDTA at least 2 hours apart from any meals or supplements.

-Two capsules a day for ten days equals about one I.V. chelation session.

-EDTA will draw away (chelate) some minerals from your body over time, so it is a good idea to add a multivitamin.”

LIQUID ZEOLITE: Many years ago, volcanoes erupted and poured lava into the sea. The combination of lava, ash and salt from the sea, caused a chemical reaction which, over thousands of years, resulted in what is now known as Zeolite. It formed in the hardened lava that is harvested and used by many throughout Asia for centuries as part of their traditional remedies to promote overall health and well being.

MINERAL SOLUTIONS AND WHAT THEY DO

Dr. Henry Schroeder, M.D., PhD of Dartmouth University said, “Your mineral needs are even more important than your vitamin needs, since your body cannot make minerals”. Your body needs not only minerals found in large quantities. it also needs many trace minerals. Medical science has proven beyond any doubt that the body can absorb essential minerals in solution form far more rapidly than in a pill, powder, colloidal or any other form. Before now, the only way to get the minerals was through (1) food, in an ionic/water soluble form, but seldom found in large enough quantities; (2) from capsules or tablets that are virtually ineffective, and (3) from colloidal mineral waters that are not truly absorbable or useable by the human body as their minerals are in particles and are not water soluble.

Clear River dietary supplements in the form of mineral waters, which are what we sell, are made by a technical, revolutionary new process with the end result being 99.99 pure water soluble minerals. This technical process turns pure minerals into an ionic/water soluble solution. The water used for the suspension is drawn from a subterranean spring for purification and processed by reverse osmosis, then treated with ozone before the mineral solution is added to produce the finished product.

We now ship by US postal service either by Priority mail, regular or flat rate, or parcel post. The need for faster service became especially important after closing the center in Kentucky so that all orders now originate from our Oregon office. We are happy that Priority mail makes faster delivery to the East Coast possible, so we ship by priority regular or priority flat rate. For larger orders we use parcel post which is much lower and takes just about the same delivery time as UPS or Fedex. In order to keep your cost as low as possible, we are no longer charging a percentage for

shipping and handling, but will stay close to what the post office actually charges us. There will be an extra charge for COD or overnight delivery, but again, only what the post office charges us.

All sales are final once the product is opened. Since herbs are a food, we cannot take any item back once the seal is broken. For all unopened product returns, a restocking fee of 10% plus the shipping costs we were charged in getting the order to you will be deducted from your refund.

[There will be no refunds or exchanges after 30 days](#)

With the purchase of each program you receive a free copy of my book, “SEASONS, MY JOURNEY THROUGH THE THREE DIMENSIONS OF NATURAL HEALING”. The book fully explains the Simian 40 virus and the diseases it causes as well as the emotional aspects of illness
